

Figure 2-11
Mile 97 Jaralosa Arroyo

Jaralosa Arroyo enters the west side of the river near mile 96.5 through a channel, which diverted flow from its original route. The channel conveys the combined flow of Jaralosa Arroyo and Berrenda Creek both of which have dams. Despite the dams, the arroyo deposits sediment that creates islands in the river. Part of the ROW is leased for cultivation (approximately 60 ac). A former meander is on the west side of the river. Although the meander is outside the hydrologic floodplain, it presents a restoration opportunity (through excavation) due to ROW width.

Targeted River Restoration Alternative

Point Project Measures	ID	#	Area (ac)
Open former meander	97C	1	28.0
Modify dredging at arroyos by creating embayments	97D	1	0.44
